Preventing Malpractice Suits in Long Term Care Facilities. These include the relationship of the risk management program to quality assurance and utilization review activities, the use of outside consultants, and the need for institutional and individual liability insurance. Relationship to quality assurance and utilization review.

## Medical Malpractice and Long

There has been a significant increase in medical malpractice lawsuits in long-term care (LTC). 1 Therefore, the facilities and the healthcare providers who work in them need to be aware of several important risk management strategies that can reduce their likelihood of being sued for medical malpractice.

## **Clinical Areas of Liability: Risk Management Concerns in ...**

Risk management is defined as a “facility-wide program designed to reduce preventable injuries and accidents and to minimize the financial severity of any claims.”<sup>1,2</sup> With the growing epidemic of litigation against nursing facilities and their personnel during the last decade, risk management has become an important aspect of day-to-day patient care.<sup>3</sup> Long-term care (LTC) facilities provide a variety of services to residents, and the potential for injury is significant in the frail ...

## **Malpractice Prevention, Patient Safety, and Quality of ...**

Example of a Systems-Oriented, Risk Management Approach to Malpractice. A major point of the Institute of Medicine report *To Err Is Human: Building a Safer Health System*,<sup>1</sup> and of much of the literature on safety in general, is that errors and adverse events are more often due to system design flaws than to individual culpability.

## **5 Questions to Ask Before Planning Risk Management ...**

Across any long term care organization, the phrase “risk management” conjures up different images – even conflicting ideas. Perhaps it’s better understood broken down. “Risk” is defined as the possibility of a loss or injury (in the occurrence of an adverse event) with the associated consequences.
